## Profile

Researcher and educator with a background in philosophy, law, biomedical science, and social impact, seeking to pivot into a high-impact career path. Skilled in analytical reasoning, interdisciplinary research, and community engagement. Experienced in developing structured frameworks for understanding agency, responsibility, and ethics, and in applying these insights to real-world challenges. Motivated to align career trajectory with the principles of effective altruism and to contribute to solving pressing global problems.

## Key Skills

- Analytical reasoning & formal logic (agency, deontic logic, decision frameworks)
- Research & synthesis across disciplines (philosophy, law, anthropology, biomedical science, history)
- Project design & facilitation (educational workshops, curriculum development)
- Stakeholder engagement & civil society collaboration
- Writing & public communication (educational content, science communication, public talks, social media outreach)

## Relevant Experience

### Impact Officer, Science and Technology Facilities Council, Oxford 2019–2020

- Designed and delivered public engagement initiatives to communicate cutting-edge science to non-specialist audiences.
- Created content to showcase the societal impact of UK-funded research in physics, life sciences, and engineering.

### Independent Researcher — Philosophy & Social Impact 2023–Present

- Developing interdisciplinary theories (Normative Obligations Network Theory; Systematic Theories of Money, Personhood, Religion, and Desert) to clarify social systems.
- Leading a master's research project *Character in Context: Agency in the Development of Virtue in Indigenous Societies* at Universiti Malaysia Sabah, with a funding proposal submitted to the John Templeton Foundation.
- Designing frameworks for understanding ownership in non-Western cultures

### Educator & Workshop Facilitator 2019–Present

- Designed workshops on **consent skills** and **ocular communication**, teaching secondary school students how to navigate responsibility and interpersonal ethics.
- Created learning resources translating complex concepts (logic, rights, responsibility) into accessible formats.

### Community & Civil Society Engagement 2024–Present

- Supporting *The Sabah Society* with a funding sustainability strategy based on Bridgespan frameworks.
- Collaborating with the *Human Rights Commission of Malaysia (SUHAKAM)* on public initiatives, including talks on Malaysia's secular/theocratic identity.

- Conducting historical and anthropological research into indigenous traditions, migration histories, and early missionary activity in Sabah.

**Volunteer — Effective Altruism Malaysia (Social Media Manager)** 2023

- Managed EA Malaysia’s social media presence to expand outreach and engagement with the EA community.
- Created and scheduled content to communicate EA concepts clearly to a local audience.
- Supported event promotion and community-building efforts within EA Malaysia.

## Education

**Universiti Malaysia Sabah** Ongoing

Master’s in Philosophy

**University of York, UK** 2017–2021

BSc in Biomedical Science

## Selected Projects

- **Consent & Responsibility Game Design** — Created an interactive game using ocular communication to teach agency and responsibility.
- **Systematic Theory of Monetary Cultures** — Developed a typology and formal logic representation of money across cultures.
- **Narrative Project on Rights & Spirits** — Storytelling initiative linking indigenous land rights, spiritual traditions, and legal philosophy.
